## U.S. Exports of Essential Oils On Track To Equal Record Set in 2002/03

\$ Million

U.S. exports of essential oils so far this fiscal year (FY) 2004 are running unchanged from the record pace of last year. Canada remains the largest U.S. export market. Note that the European Community (EU) now includes all 25 member states. U.S. exports to Japan are increasing, but have not reached the level of 1996/97 when exports of essential oils to Japan were \$139 million.

### NOTICE

*Tropical Products: World Markets and Trade* (This circular is available on our Web site in March, June, September, and December.) Circulars will be released at 3:00 p.m. on the scheduled release date.
